EUROPE AFTER PRECESSION

Europe was strangely disinterested in precession, zodiacs and ascendant sets until recent. Already Hipparchus who rediscovered precession had a word of rebuke as concern those who pretended that the skies were fixed, in other word, them astrologists.

OBSERVING CIVILISATIONS

Precession is a merry-go-round of the stars and constellations that was known to observing civilizations. The present civilization is not observing the skies at all. European astrology was based on sheer superstition, the same rebuked by Hipparchus. False zodiacs and improbable ascendant sets went under the fixed nose of astronomers and still do. Kepler, Newton or Nostradamus never suspected something was wrong, as the fixed mind of the believer never notices any changes at the horizon.

EASTERN ASCENDANTS

The present epoch displays only 16 ascending constellations at due east but in former epochs the number of ascending constellations at due east was doubled. Only naturally so, because the present epoch narrows the horizons through unification, unisex and Internet. The New World Order implies boxing languages, zipping cultures and fixing the ascendant set. The modern man is a product with exactly the same functions and wishes whether easterner or westerner. Nowadays even them Eskimos dye hair and zip files.

THE HOLE

The first analysis of the horoscope is centered on the WMAP cold spot, Eridanus being an ascending constellation at the present epoch. The jeans were invented in Genoa, Italy. If the skies were the bottom of a girl named Nuit, her jeans would be stripped at that point. There is a big hole in the sky that was discovered as we announced the “second coming” of the antichrist in August 2007. As 2002 AW₁₉₇ and Venus penetrated Hydra, the WMAP cold spot was discovered and baptized Witchallow. This hole can ascend at east in a horoscope, since Eridanus is one of the 16 ascendants for the current epoch. It may be well your own natal ascendant, but you were not to know it during the dark 2000 year reign of Nostradamuses, Keplers and Galileos, that is superstitious fellows that never bothered about zodiacs or the precession of the ascendant, much as their followers do not bother now. The devil is the master of lie and liars and nobody is innocent, not even the victim, since there must be some evil in those who believe in fixed skies and false zodiacs. Luckily, the Academic Zodiac with its 22 constellations is fully aligned with the great observing civilizations such as the Mayan that is about to teach us a lesson in 2011.
