ASTRO QUIZ

Copyright © 2008 by Klaudio Zic, all rights reserved. <http://www.lulu.com/astrology>

GOD FORBADE ASTROLOGY?

There is mention of Orion and star clusters, even organized zodiacal constellations in the Bible. The Earth is described as hanging in the void. Therefore superstition has nothing to do with the Bible. God encouraged humanity in using universe as a giant clock as based on precession. That is exactly what the Kemites and Maya did. God forbade lie, that is fixed systems that have nothing to do with creation and precession.

THE 12/12 SUPERSTITION

Due to false scientists, people believe in an unchanging sky with a fixed set of 12 ascendants. That is hilarious, absurd as well and easily unmasked¹ as superstition. The ascendant set is changing, otherwise we would no have precession at all. The ascendant set is changing with epoch. The number and quality of ascending constellations differs with epoch. The current epoch affords for a moderate set of 16 ascendants, while previous epoch has a much larger choice of ascendants. That confirms nicely with globalisation.

GOD & NASA

Chaldean astrology was obviously not updated for precession, much as nowadays superstition. God knew that humanity is prone to error. The 12/12 astrology model is in dangerous error, as there is nothing funny in global superstition at all, rather a tragedy for a space bound humanity that nevertheless believes in obsolete and crippled stellar models like sidereal, Indian and tropical astrology or worse.

¹A glance at the sky, even virtual sky, will show the true ascendants rising. There is a host of online planetarium programs to chose from, for those who wish not install an astronomical program.

ECOLOGY IN THE STARS

TRUE NATAL SKIES

The stars reflect on Earth from their natural position and not from the popular horoscope, as universe is against superstition. The devil has many enemies.

AN ASTROLOGICAL LEGACY

From the legal point, an astrology as based on 12 signs and 12 ascendants is not legal at all, since the planetary models as found in various civilisations are by far more complex than Dendera itself. While temporary simplifications are welcome in their task to illustrate universe in compact form, static models are fatal for a race that moves on. The ascendant has never been frozen on the spot as precession dictates the change of the constellations that rise in the east according to epoch. Thus at the time of the big quake, it was Sextans that rose at east, in synchronicity with Orcus in Hydra and Saturn in Leo.

GALACTIC ECOLOGY

In order to care for planetary and galactic ecology, one observes the great cycles like precession. Observation is not easily tricked since there are many astronomers who agree on most observations that have intrinsically nothing to do with local creed. The Cat's Paw Nebula is the same for Egypt, India or Peru, when it lacks local mythology and national interpretation. On the other hand, a zodiacal constellation as Orion can be easily understood as underworld descendant in popular Kemitic astronomy, since Osiris is the lord of the underworld, the subconscious part of the universe and local world zodiac.

ASTROLOGICAL PIRATES

It goes without saying that anyone pretending to read ecological portents from an unnatural set of symbols can not possibly account for any ecological contribution for the

planet. The false New Age prophets do not account for precession, equinox and position of the sun against the starry skies. The devil has fed many false prophets who dabble with 12 signs and 12 ascendants, while rejecting the real sky, if they have a notion of the real sky at all. Their predictions are based on false ephemeris and 12/12 fashioned horoscopes that enslave the planet while producing psychological and ecological catastrophe. A planet ruled by false signs is lacking emotional balance and nowadays the error is greater than mere two signs.

THE DEVIL IN THE HOROSCOPE

In order to understand nature, God and universe, one observes creation with inner eye² but also with modern ears and eyes and scientific method. While the Chinese equatorial astronomy system is still fully scientific and operational, the devil provided yet another way to trick false ego into the simple hell of a 12/12 sign system, and that by assuming that the ascendants equal the zodiacal signs forever. The devil tricked Adam by sweeping precession under the carpet. Kepler, Hipparchus and Nostradamus are just the most recent victims of such a maneuver against planetary ecology.

2002 AW197

As the asian continent is torn apart and shaken, the Chinese need more than just ||::| magick charms³ in order to alleviate unnatural catastrophe from their legacy as shamans and thinkers. Equatorial astrology has been replaced with an even more natural scientific frame as based on azimuth and altitude, that is the way we naturally observe the skies.

²An inner eye is not necessarily something partially physical as Bindu. As concern the Tree of Life, it is under the magnetic spell of Neptune that inner vision takes place, as vaguely associated with Lord Father and Ajna cakra. See also RTRRT, O5 “cakra walk”, or discreation cakra by cakra.

³The dams are about to break as the earthquakes continue after the last Moon in Sextans. Orcus, Saturn and 2002 AW197 are now aligned for a prolonged catastrophe.

ASTROLOGICAL CODEX¹

The Astrological Codex regulates as well as updates the standards as used by astrologers².

1. The Astronomic Zodiac defines the position of the planets⁴³.
2. There are 22 IAU⁴ zodiacal constellations⁵⁵.
3. The eastern ascendant defines the ascending star or object of interest⁶.
4. The present epoch defines 16 precessed ascendants.
5. While the local zodiac⁷ normally consists of a fixed number of constellations, the precessed ascendant set changes according to precession. The local zodiac is thus defined for each object separately, that entails planets, satellites, the Sun, Earth co orbitals, Apoheles, centaur objects, dwarf planets, comets and spacecraft.
6. The Cartesian house system⁶ is applied to a variety⁸ of zodiacal situations⁹.
7. Scientific astrology extends to the region of the WMAP cold spot, and thus beyond this universe and into parallel universes.
8. A human being with the WMAP cold spot in Eridanus ascending in one's horoscope can be treated as superhuman for all practical purposes, even parallel being or inorganic scout. This according to scientific astrology including astral or invisible planets in its scope. The parallel universe is thus included in the astrological chart.
9. Scientific astrology covers all Vedic astronomy, astral planets including.
10. Scientific astrology is applicable to Mayan, Egyptian and Chinese systems⁷.

⁴ The statement implies that there is only one position of the planet, namely astronomical.

⁵ The standard has been set in August 2006. The historical zodiacs are available from the site. Of the historical zodiacs the X and P zodiac are still in common use.

⁶ Historically known as Night & Day house system; a unique house system that replaced the obsolete experiments in housing planets.

⁷ Under the precise coordination of scientific astrology, the systems can even cooperate, when based on astronomy. Systems based on superstition are of course never compatible with the real sky.

CHINA QUAKE

CARDINAL POINTS

The ascendant for the devastating May 12th Chengdu earthquake is masonic Sextans. The descendant is Aquarius. The northern constellation is Draco while the southern is Reticulum. The Pleiads with Witchallow⁸ are on the meridian.

RISING PLANETS

Orcus is rising in Hydra near the earthquake's true ascendant is Sextans. Saturn is rising in Leo with centaur Okyrhoe in Leo. Hylonome is southern in Scorpius with 333 degrees of azimuth.

OBSERVATIONS

The northern asteroid is strangely indicative Olympia, in Hercules. Centaur 2000 FZ53 is below in Serpens Caput⁹.

CONSIDERATIONS

Along with Orcus, 2002 AW197 is the main earthquake¹⁰ provoker. The Moon is in Leo, rising with 2002 AW197¹¹ in Hydra.

AFTERMATH

⁸WMAP cold spot. See dedicated publications.

⁹The ascendant of Italy, the U.S.A. Have Serpens Cauda ascending.

¹⁰2002 AW197 is precisely known for causing sea quakes, especially when in Hydra.

¹¹2002 AW197 is rising at 05:28 UT, precisely a hour before the time we used for the map.

The tail of the dragon kills as purported by Moon in Sextans. As we write this, China is shaking still and there is concern for the stability of the damaged dams. If dams break, we have a biblical situation and not mere great unnatural catastrophe.

- ¹ Some versions and upgrades of the Astrological Codex may be partly be classified for free distribution, however, the integral version is updated on the site www.lulu.com/astrology
- ² Sometimes we use “astrologist” to denote the sad victim of a precession-free superstition. The astrologer as defined in the Codex is mostly a being that cashes on the true sky for any calculations about the future.
- ³ That is, the position of the planets against the tapestry of stars. There is only one hole in the tapestry but scientists suspect an anti scion.
- ⁴ Since the NASA ephemeris system is the official reference, it is best to check with the NASA mainframe when in doubt about any zodiacal positions, such as e.g. Venus in Crater, which we did at length as published in our zodiacal reformation series.
- ⁵ The definition applies to the zodiac for planet Earth. The local zodiacs are elaborated in great detail in *Planetocentric Astrology* <http://www.lulu.com/content/652589>
- ⁶ This includes the starless region of the WMAP cold spot.
- ⁷ The local zodiac is defined by the spacecraft mainframe.
- ⁸ Here is an example of application for a birth on planet Earth. In the year 2004, a baby was born with Moon in Cetus ascending, Mercury in Sextans, Venus in Orion, Juno in Scutum and Pluto in Coma Berenices. These positions are of course clearly visible in the Cartesian chart wheel.
- ⁹ The unique house system resolves a variety of problems dealing with latitude, elevation or depression. It has been tested on spacecraft, meaning that it is applicable to the board mainframe. In the case that a horary chart is needed in an alien system, the computer proposes the local zodiac along with essential solutions for the astrological calculation. Our examples already include the horoscopes of babies born on our mining coorbitals like 2002 AA29 or Cruithne.
