NON-RISING EASTERN ASCENDANTS

The ascendant set is always measured at due east. There are 16 ascendants rising at east for the *present epoch*. The ascendant set was measured for *different epochs as well*, as published along with the appropriate results⁶. In summing up, there are 88 ascendants in a precession cycle. At the present epoch, the following zodiacal constellations ***do not*** rise at east: ***Scutum, Sagittarius, Capricornus, Aries, Auriga, Gemini, Cancer, Crater, Corvus***

¹Nobody you *know* was born with these ascendants.

²The Astrologer is the Avatar of the Age which he rules.

³Also Age of Osiris or the Stargate. The Age was the Age of true mind reemerging from below the ecliptic.

⁴The present Age. The next one is the Age of Cetus III.

⁵The next Age of Pegasus, the original preceding Dante.

⁶In ancient Egypt, one would e.g. observe two dozen ascendants over the eastern horizon.

and Libra. Taurus is rising only for five minutes at east in a daily cycle. In the next cycle, Venus will rise in Pegasus at east, thus announcing the new Æon.

What does the introduction has to say to a common man? In poor words **Sagittarius, Capricorn, Aries, Gemini, Cancer** and **Libra** are not ascendants. Nobody you may know was born with **Aries, Gemini, Cancer, Libra , Sagittarius** and **Capricorn** ascendants. It is easy to prove this simple fact by the naked eye observation of the eastern sky anywhere on planet earth. This says much of the nature of superstition in our illuminated Age of Cetus II.

NATIONAL ASCENDANTS

The national ascendants are the first thing that was miscalculated. Heraldry followed suit. Whole nations have been led and inspired by unqualified heraldry, equaling debased Masonry. People lived and died for stems that they never understood. Apparently even great conquerors like Alexander the Great were directed by dubious astrology.

EUROPEAN “ASTROLOGY”

A typical example of lack of taste in an asinine superstition is the non-existing European astrology. People believe that astrologers of old times believed in twelve signs rising at east. This is impossible because the twelve signs do not rise at east. Taking for example the current epoch, a string of 16 ascendants rises at east. These 16 stations of Earth do not contain the 12 astrological signs.

DEVIL

Why is it hard to believe in something so evident? This question was the stumbling block of material science for a long time. The reason is transcendental. The secondary role of propaganda is comparatively irrelevant, since false ego was already programmed to

believe in lies. The lord of this world⁷ “bestows” the newborn human baby with false ego at an early stage. The baby is of course born of true mind. It *was* pure until default mind.

Purport

⁷Or the lords of human beings, personal devils. As the devils are apparently disinclined towards unnecessary differentiation, we can consider default ego as an uniform global pseudo-human mind.

FINANCIAL 2010

Prostitution takes on many forms with superstition in ascent. Sextans is the central zodiacal ascendant as mediating between Archangel Michael * Regulus and the heart of the heavenly snake * Alpheratz. The financial status for the year 2010 takes the pulse from Orcus⁸ sneaking betwixt Sextans and Hydra, as 2002 AW₁₉₇ presses steadily upon the shadow market⁹. Let us not be fooled by the softness of the Hydra neck¹⁰, since Hydra is still the longest zodiacal ascendant of all. The most powerful reptilian constellation may be faint, but the dragon has a stout heart. Orcus playing with the heart of the solitary snake brings dark forces to the front. This front may be the back door of the Masonic lodge, according to the standard Masonic attributions of the lower limb of Sextans.

AGE OF CETUS II

One of your minds is not your own. This mind believes every kind of nonsense, from flat Earth to 12 zodiacal ascendants. There are two types of mind in a human being. One is

⁸*Orcus Report.*

⁹2002 AW₁₉₇ is of course still in Hydra.

¹⁰An allusion to Venus ascending in Hydra.

“bestowed” by the devil, the other is original. The inorganic pests that caused the fall of Adam have apparently a common collective mind. The superstitious mind is equal for all, unisex, like cheap jeans. The original mind is a rare possession. It is true mind that easily pierces through lie. This mind is not based on fixed belief. It is not organized in a binary way. It does not pertain to others carbon copy fashion. What was discovered as global mind is default mind in the world as ruled by the lord of this world. Default mind is the mind of the lord of this world. It was never human at all. Examples of default mind are everywhere from Soviet collectivism to the to the American dream. Both blocks share the inorganic organization model of the devils. Accordingly, western and eastern astrology both miscalculate as if to confirm to the devils' lack of interest for solar system dynamics, as well as lack of mathematical skills. Not every inorganic pest from a parallel universe is gifted with a Pythagorean mind. Geometry is holy precisely because it exorcises the devil. Of course, the superstitious masses never know that the devil exists. As soon as one becomes aware of it, the fight begins. The masses are lulled either by democracy or other types of oppression, too busy feeding the devil with futile emanations of emotion towards passing phenomena. It takes an avatar to awake them, even in the Age of Cetus II. On this planet, avatars are alas viewed with suspicion, if not stoned or crucified by the lord of this word.

ASTROLOGICAL AVATARS

Precession is the chief possession. The reformation of the zodiacs happens at any stage of precession as the avatar of the given Æon rearranges the mess as left behind by any marketplace diviners. The rearrangement is made more or less for one's next incarnation. Of course, every avatar is able to calculate or intuit one's own next incarnation. The matter at hand is however not linear as an easy equation at all. A given age is given specific stress in the form of a constellation or motive; thus, in the Age of Orion, the submerged ascendants were the light-motive. The Age of Cetus III brings the subconscious ascendants back to front. The next illuminated Age of Pegasus will venerate Venus ascending in Pegasus, much as this Age of submarine wars has Eris in Cetus.

NEW AGE

New wage consisted in exploiting large masses of superstitious people according to marketing laws. In the Age of Cetus II, piscine vibrations still occasionally penetrate through media in the form of old-fashioned horoscopes. What you get is the same old 12/12 nonsense along with a space chunk, castrated comet like Chiron and a couple of asteroids. People who will die without ever knowing their Sun sign become national heroes, dabbling with transits as the planes hit the WTC.

WTC MOON

Why did the planes hit WTC? Astrologically speaking, there are two reasons. Both of them were screened from “astrologers”, precisely because at the time there was not a single astrologer in the USA or world-wide. There is a little evil star near the Stargate in every horoscope. There is an evil star in Orion. A known terrorist has been born with Mon in Orion. This Moon in Orion was conjunct this little evil star. When the WTC was hit, the Moon was sitting precisely on that little evil star in Orion. Orion is one of the 22 zodiacal stations. This and many other things were screened from your “astrologers”. In fact, for the newspapers that you might still purchase, it was “Peace and prosperity with the entrance of Jupiter in Cancer.” These people of course have no idea as to planetary positions at all, starting from their own horoscopes. This stuff is easily exposed and ridiculed according to NASA standards. NASA standards are already incorporated within the core of even the worst “astrological” program. Ever discovered the planetarium?

WTC ERIS

Eris was sitting on the NYC western horizon precisely to the minute. Eris in Cetus along with Moon in Orion delivered the fatal blow. Gigabytes of material has been published and distributed solely as centered on the WTC problematic, yet your next door astrologer probably believes in the 12/12 nonsense. People still e.g. think that Gemini is rising at east or that the 12 zodiacal signs are really rising at east. That is nonsense. An astronomer

would not even discuss such dark stiff superstition. In the Age of Cetus II, dolphins and whales assume crucial role in the vibration of the planet. Alas, nuclear submarines take over and e.g. London bombing happens with Mars in Cetus.

NON-ASCENDING ZODIACAL CONSTELLATIONS

The ascendant set is always measured at due east. There are 16 ascendants rising at east for the *present epoch*. The ascendant set was measured for *different epochs as well*, as published along with the appropriate results¹¹. In summing up, there are 88 ascendants in a precession cycle. At the present epoch, the following zodiacal constellations *do not* rise at east: ***Scutum, Sagittarius, Capricornus, Aries, Auriga, Gemini, Cancer, Crater, Corvus and Libra***. Taurus is rising only for five minutes at east in a daily cycle. In the next cycle, Venus will rise in Pegasus at east, thus announcing the new Æon.

SOLAR INFORMATION

Sai Baba was born on November 23rd with Sun in Libra. One's own Sun-sign can be found by consulting the authoritative NASA Sun ephemeris as posted to our site <http://lulu.com/astrology>

ASCENDANT SET

The ascendant set for the current epoch serves any astrologer fairly well through a long range of interest. This range is even large that the typical ephemeris tolerance in a dwarf planet. That means that Scorpius or Sagittarius were not rising at east in Philadelphia at all. However, in inspecting other epochs, like the Age of Orion, we shall adopt the ascendant set for the epoch at hand. Typically, where we have only 16 ascendants, in a remote epoch we shall work with twice that number. We live in a poor, unisex, uni-mind epoch. There is lack of diversity as the planet breaths as one.

¹¹In ancient Egypt, one would e.g. observe two dozen ascendants over the eastern horizon.

FINANCIAL TIMES

Orcus and 2002 AW₁₉₇ “Tekton” are not the only financial barometers in a mundane horoscope. Besides angular aspects¹² between outer planets, at least two newly discovered objects mark this period, namely **2007 OR**₁₀ and **2007 JG**₄₃. One is a dwarf planet¹³, the other a centaur. *Their copious delineation was published early this year.* The relation between **Neptune, Jupiter**¹⁴, centaur Nessus at the border betwixt Microscopium and Piscis Austrinus, fatal Damocles, 2002 KY₁₄, centaur 1999 OX₃, comet Chiron¹⁵, 2007 OR₁₀ along with an occasional brush-by such as by an Apohele as 2000 PH₅, marks our financial times.

¹²Accurate aspects between planets greatly differ (ditto) from those as presented in amateur, that is, “astrological” programs.

¹³Will be probably classified as dwarf planet by the IAU.

¹⁴Both Neptune and Jupiter are in Capricorn and thus can not rise at due east.

¹⁵Castrated as it was as centaur, Chiron is by now classified as dead comet.
